## Soft Skills

- Leadership Quality
- Dedicated
- Hardworking

## About Me

Detail-focused problem-solver dedicated to achieving operational excellence. Proven ability to master new concepts quickly, leveraging strong communication and leadership potential to ensure high-quality contributions on every project.

## Project

### Ai Based Traffic Management System

Developed an AI-based traffic management system that uses real-time data to monitor and control traffic flow. Implemented machine learning algorithms to optimize signal timings and reduce congestion. Designed the system to improve road efficiency and minimize human intervention.

## Education

### 2020

School Name	J N V H
Percentage	10th--72.3%

### 2022

College Name	J N V H
Percentage	12th--77%

### 2022-2026

College Name	M R I T
Degree	Bachelor of Engineering
Branch	Computer Science and Engineering
